

V.L. Karmata
Junagadh.

My name is Vijay Karmata. I am 37 years old. Last year I started some physical problem. If I walk little I used to **get breathlessness and tiredness** and also **idleness** too much. I consulted my family physician and he suggested me to do some investigation and whatever investigation I did, the reports are as follows:

S. Cholesterol – 273
S. Triglycerides - 183
S. HDL. Chole – 41
S. LDL. Chole – 195.40
V.L.D.L – 36.60

According to my Physician my **Cholesterol, Triglycerides & L.D.L** were higher than normal. And due to that I was having such type of physical problems. Meanwhile one of my friends suggested me to take Wellness Noni and he told definitely you will get relief. I started consuming Wellness Noni and within a month I started getting relief from my physical problems, so I continued to take. After 2 months again I did all the investigation which is as follows:

S. Cholesterol – 92
S. Triglycerides - 47.89
S. HDL. Chole – 48.54
S. LDL. Chole – 43.88
V.L.D.L – 9.58

I showed all the reports to my physician and after seeing it he surprised too much. Now I want to continue Wellness Noni so I can live healthy forever.

Thanks to Wellness Noni
