

Leenaben Mehta
Surat.

My name is Leenaben Mehta. I am 58 years old. Since 5 years I have a **tumour in my liver [Granulosa Cell tumour of Liver]**. Since last so many years I took many medicines. After some time I developed **Ascitis**. And my abdomen increased too much with bad fluids. And there was a swelling all over my body. My blood reports were also abnormal. I did ayurvedic treatment also but whatever improvement I wanted I could not get. One day my Doctor gave me Wellness Noni and stopped rest of the medicines. Before starting Wellness Noni my all the reports were as follows:

PPBS – 219
SGPT – 193
SGOT – 241
Alk.Phos. – 1681
S.GGTP – 1148

Reports after consuming Wellness Noni for one month are as follows:

PPBS – 179
SGPT – 24
SGOT – 28
Alk. Phos – 301
S. GGTP – 136

Whatever results I did not get since so many years of time I got that result after consuming Wellness Noni within 1 month. Now my health is on improvement. After seeing reports my Doctor also became happy and surprised.
