

Name : Leo

Age : 16 months

My son Leo is 16 month old. He is premature baby, his birth is at 34 weeks pregnancy and his weight at birth 2kg and 400 gm. I am a doctor so I very tense about him. After 10 month he has severe constipation. He cannot pass stool because of its hardness. He was crying 4 or 5 days. Due to this problem, I had afraid about his physical development and mental progress. So I have discussed this matter with Moneta's Dr. Joban Modha (M.D. Ayu.) and he suggested me Wellness Noni for my son.

I gave 1ml Wellness Noni once in a day and he has relief.

Thanks Wellness Noni
