

Harshal Virendra bhai shah
Vasna,
Ahmedabad.

I am suffering from Diabetes since last one year. My blood sugar regularly measures FBS 140 and PPBS 350 level and was not controlled by tablets. So many physicians advised to take insulin injection for the control of my diabetes. I was taking 14 units insulin per day and 500 mg tablet once in a day but still my sugar level was not in control. I am working in MNC as an executive. My job profile is very stressful and target achievable. Due to my high blood sugar level I was remain too much tired and fatigued.

One of my colleague introduced Wellness Noni. I have started to take five ml twice a day regularly. After one month I was gone for my blood sugar reports. Surprisingly my blood sugar FBS was 82 and PPBS was 130. My physician was also stunned and surprised. He immediately stopped insulin injections and now I am regularly taking Wellness Noni and I am sure it will prevent me from having any kind of disorder because I have complete faith on Wellness Noni now. It is efficient and miraculous.

Hats off to Wellness Noni
